Invitation - Save the date

The University of Basel, together with the Research Ethics Committee of the Canton Zürich and swissethics, invites you to an international scientific symposium.

The aim is to discuss how scientists, clinicians, regulators, research ethics committees, academic institutions, and funding agencies share responsibilities to enhance value and progress in science and medicine. This was a key concern of Prof. Meier-Abt as a researcher and former vice-rector of the University of Basel.

National and international speakers from renowned universities will present cutting-edge examples of data sharing and collaboration between various actors that are vital to foster high quality international biomedical research. Concrete steps will be debated regarding how to overcome present shortcomings, enhance translation in biomedicine, and strive towards a culture of collaboration.

Yours sincerely,

Prof. Bernice S. Elger
Head Institute for Biomedical Ethics
University of Basel

Prof. Torsten Schwede
Vice-rector
University of Basel

Dr. Susanne Driessen
President swissethics
Swiss Association of Research Ethics Committees

Dr. Peter Kleist
Managing Director
Cantonal Ethics Committee Zürich

Prof. Martin Schwab
Institute for Regenerative Medicine
University of Zürich

A detailed program of the symposium will be provided in due course
